

Freedom of choice. I want to listen to commercial free radio...that is why I PAY for my service and do so willingly. I live in San Antonio Texas and have for 20 years. There are 3 rock stations, classic and alternative and a combination of classic and alternative. Just the other day I was driving a car that had no satellite radio so I listened to local. I turned on the classic and find it alarming that 20 years later they are still the same I want to be able to listen to new music without all the commercials and talking DJ's and not the same songs over and over and over and over and over.....
